**1. Initial Contact & Issue Reporting:** Reach out to us with details of the blockage issue. We prioritize prompt communication and arrange for a professional to address the clog swiftly.

**2. On-Site Assessment & Diagnosis:** Our technician arrives at your location to assess the nature and severity of the clog. Using diagnostic tools, we identify the exact location and cause of the blockage.

**3. Customized Plan & Quotation:** We develop a customized plan to address the clog and provide a transparent quotation that outlines the work involved, costs, and expected duration.

**4. Unclogging Procedure:** Utilizing specialized equipment such as augers, drain snakes, or hydro jetting, our technician meticulously performs the unclogging procedure to remove the blockage and restore flow.

**5. Testing & Verification:** Post-unclogging, we conduct tests to verify that the flow has been restored and that there are no remaining or secondary blockages in the system.

**6. Preventive Measures & Recommendations:** We provide recommendations and preventive measures to avoid future clogs, such as regular maintenance, proper waste disposal, and installation of drain guards.

**7. Clean-Up & Final Walkthrough:** We ensure the workspace is cleaned and free of debris. A final walkthrough with you ensures your satisfaction and the successful resolution of the clog.

**8. After-Service Support:** We remain available for any follow-up queries or support. Our commitment is to ensure your systems remain clog-free and functional.
